CONTENTS

Toni MIHALCEA	Duality for multiobjective programming involving second order generalized type I functions	177
Nicoleta ULARU and Daniel BREAZ	Univalence conditions for analytic functions	187
Marilena CRUPI and Carmela FERRÒ	Revlex ideals in the exterior algebra	193
Farshid MEHRDOUST	A randomized algorithm for estimating the condition number of matrices	203
Amjad ALIPANAH	Solution of Hallen's integral equation by using radial basis functions	211
Satyabrota KUNDU	On P-Sasakian manifolds	221
Monica PATRICHE	Existence of equilibrium for an abstract economy with private information and a countable space of actions	233
I.G. AMIRALIYEVA	Numerical method for a singularly perturbed differential system	243
Ting-Bin CAO, Kai LIU and Jun WANG	On the growth of solutions of complex differential equations with entire coefficients of finite logarithmic order	249
M. Eshaghi GORDJI, S.A.R. HOSSEINIOUN and A. VALADKHANI	On (-1)-weak amenability of Banach algebras	271
Sana JAVED and Ioan TOMESCU	Chromatically equivalent k -bridge hypergraphs	281
Bogdan IFTIMIE	An portfolio optimization problem with a corporate bond	287
