

REVUE ROUMAINE  
DE MATHÉMATIQUES  
PURES ET APPLIQUÉES

(ROMANIAN JOURNAL OF PURE AND APPLIED MATHEMATICS)

TOME LVII • N° 4 • 2012

---

SOMMAIRE

---

|   |   |     |
|---|---|-----|
| Sophie DABO-NIANG,<br>Zoulikha KAID and Ali LAKSACI | Spatial conditional quantile regression: weak consistency of a Kernel estimate . . . . .  | 311 |
| Valentin IONESCU                                    | A note on amalgamated Boolean, orthogonal and conditionally monotone or anti-monotone products of operator-valued $C^*$ -algebraic probability spaces . . . . . | 341 |
| Raj KUMAR, Sushma GUPTA<br>and Sukhjit SINGH        | A class of univalent harmonic functions defined by multiplier transformation. . . . .   | 371 |
| Kuldip RAJ and Sunil K. SHARMA                      | Some vector-valued sequence spaces defined by a Musielak-Orlicz function . . . . .  | 383 |
| Andreea Mădălina STANCU                             | Optimality and duality for multiobjective fractional programming problems with $n$ -set functions and generalized V-type-I univexity. . . . .                   | 401 |
| Bahri TURAN and Mustafa ASLANTAŞ                    | On principal ideals and bands in $l$ -algebra . . . . .   | 423 |
| <i>INDEX ALPHABÉTIQUE</i>                           | . . . . .   | 431 |
