

MATHEMATICAL REPORTS

VOL. 12(62)· No. 3· 2010

CONTENTS

Monica LA BARBIERA	On a class of monomial ideals generated by s-sequences
Giuseppe CARISTI, Massimiliano FERRARA and Anton ȘTEFĂNESCU	Semi-infinite multiobjective programming with generalized invexity
Mona-Mihaela DOROFTEI	On second order overdetermined differential systems
Ulrich HERKENRATH, Marius IOSIFESCU and Andreas RUDOLPH	Linear autoregressive models
B. IFTIMIE, M. MARINESCU and I. MOLNAR	Gradient representation for cad-lag solutions of SDEs with jumps
Gheorghe OROS	Briot-Bouquet strong differential superordinations and sandwich theorems
Dana PICIU and Cătălin BUȘNEAG	The localization of commutative (unbounded) Hilbert algebras
Marius ȘTEFAN	Prediction of a small area mean for a finite population when the variance components are random
