CONTENTS

Mehdi ALAEIYAN and Mehdi REZAEI	Intransitive permutation groups with bounded movement having maximum degree
Amjad ALIPANAH	Numerical solution to differential equations via hybrid of block-pulse and rationalized Haar functions
Mioara BUICULESCU, Viorel PETREHUŞ and Gheorghiuşă ZBĂGANU	Iterated integrated tail with periodic hazard rate
M. ESHAGHI GORDJI, A. EBADIAN, R. AGHALARY and M. DARUS	Starlikeness and univalence criterion for non-linear operators
Madani MOUSSAI	The composition in Lizorkin-Triebel spaces via para-differential operators
Udrea PĂUN	General Δ -ergodic theory, with some results on simulated annealing
Dorina RĂDUCANU	On a subclass of univalent functions defined by a generalized differential operator
Ahmet TEKCAN and Arzu ÖZKOÇ	n-universal quadratic forms, quadratic ideals and elliptic curves over finite fields
